Robotic Research LLC: Who we are?

Offering Innovative Engineering Solutions

- Autonomous Ground Vehicles
- Obstacle Avoidance
- GPS denied positioning
- Pedestrian localization
- Leader-Follower Operation
- Command and Control Systems
- Cooperative Control (Unmanned & Manned)

- Intelligent Architecture
- LADAR (LIDAR)
- Watercraft Control
- 3D Printing Solutions

Small Business founded 2002
Program Highlights

VTI  CAMS  MAGIC 2010  ATRIB AUTO

SANDI  RCTA

Safe Ops  SOURCE  SUSI

Leonard Wood Bus

Robotic Research Proprietary
Leader Follower Video
ARIBO – Fort Bragg

- On-demand transport system for solders, cadre, and medical staff
- Operational Area: 5 stops 1x1km
- SAE Level 4 operations
